UV DRYER

4030

DUBUIT

The **UV DRYER 4030** is dedicated to cure oval and flat objects. The objects are placed lying down on the fiber belt conveyor and pass in straight line through the curing chamber.

A precision parabolic reflector focuses the UV rays on the object surface to ensure optimum curing and using the lowest energy. The distance between the objects and the reflector assembly is adjustable from outside for an easy focus.

- ▶ *Fiber glass belt*
- ▶ *Half power device*
- ▶ *Lamp of 12 inches long with 300W /inch lamp*

Options available on this machine:

- ▶ Special lamp to dry glass objects
- ▶ 400W /inch lamp for more power
- ▶ Electronic Power Ballast : Control from 0 to 100%
- ▶ Special big size object (Max height: 150 mm ; Max width: 500 mm)
- ▶ Longer conveyor and special cover protections

TECHNICAL DATA

POWER :	From 6 to 7.5 kW
SIZE OF OBJECTS :	
Max. Height or thickness	140 mm
Min. Diameter or width	300 mm
Conveyor Speed :	0-20 meter / min
Higher speed :	0 – 35 m/min available on request

▶ Adjustable conveyor speed

▶ High speed on special request
