

FLAME 49

Semi automatic
Flame treatment machine

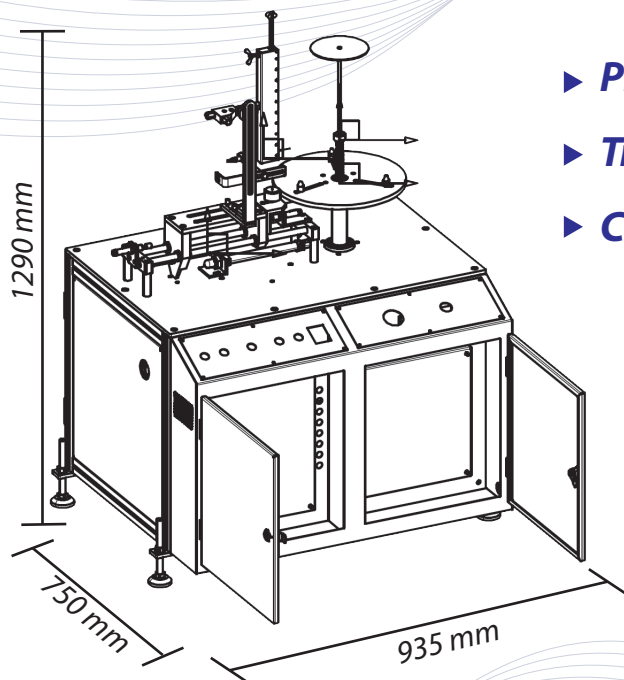

DUBUIT
Screen Printing Machinery
www.dubuitfareast.com

The **Flame 49 machine** is designed to flame treat square, round and oval objects (4 sides in one single cycle). The machine starts rotating once the object is set on the tray. The rotation of the device also ignites the burner automatically.

The rotating system underneath the tray adapts its movements to maintain the burner constantly at the optimal distance from the object. For square objects, a sensor turns off the burner to avoid flaming the corners.

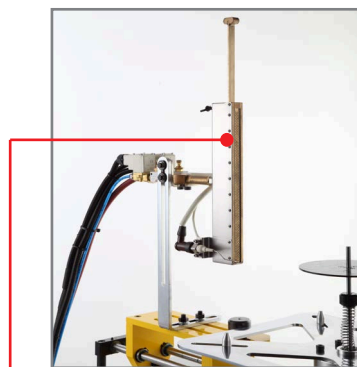

- ▶ **Practical use for crates, pails and oval objects**
- ▶ **Treats various sizes of objects**
- ▶ **Compact heavy duty machine, easy to maintain**
